

#LetHerDecide

H.R. 1370 / S. 562 Breast Cancer Patient Equity Act

Breast cancer survivors should have the option to choose the best solution post-mastectomy.

Currently, one of the only body parts not covered by Medicare with a custom replacement is the breast.

Medicare already has a code and an allowable amount in place for L8035, custom breast prosthesis.

Women deserve to have all recovery options available to them after a mastectomy.
